

Remote Deposit

With our Remote Deposit service, you can make deposits right from your location—at your convenience—day or night.

Time is money with your business. You shouldn't have to waste either one. With our Remote Deposit electronic check clearing service, you submit checks for deposit using your PC, standard Web browser-based software, the scanning equipment we provide. You'll realize two immediate benefits—significant operational savings and improved overall funds availability.

We Make It Easier

With Remote Deposit, you'll never have to go to the bank or need to call a courier service to deposit customers' checks again. Everything is done electronically!

Immediate Electronic Deposit

When you use Remote Deposit, an electronic deposit will be made to your Northwestern account. Timely deposit reports are also available electronically.

Extended Deposit Window

Have you ever been too busy to make it to the bank before it closed? With Remote Deposit, you can make deposits from your location—at your convenience—day or night. Deposits can be made from multiple locations.

Electronic Check Conversion at Point of Deposit

Once checks are scanned and tallied, a substitute check is presented to the paying bank and the original deposit is posted to your Northwestern account.

Float Time Reduced

Remote Deposit gets you your money faster. By eliminating the physical transportation of your customers' checks, Remote Deposit eliminates up to two days of float time. There are no delays from uncontrollable factors, fraudulent checks are identified sooner, and deposits can be made anytime.

Decreased Fraud Risk

Accelerated clearing improves overall funds availability and reduces the risk of fraud.

Enhanced Funds Management

All your business transactions, including deposits from multiple geographic locations, can be consolidated into one Northwestern account.

Streamlined Operations

Operations are streamlined using the convenience of deposit automation—including check image storage and retrieval, historical deposit activity reporting, and data exports to other applications.

HOW IT WORKS
